

# Livestock Water Storage

## Discover the Difference with Pioneer® Water Tanks

Invest once in a Pioneer® Water Tank for livestock and you won't need to replace it due to corrosion or melting, unlike with a poly tank. The Zinalume® tank body and roof outlast galvanized tanks by 200%, according to BlueScope Steel studies, with unmatched corrosion resistance. The Aqualiner® tank liner protects the water supply and is NSF 61 certified, BPA-free with a 65 year lifespan.

Discover why the Pioneer® Water Tank is the Choice for Livestock Water Storage

- 🔥 Delivered and installed on site
- 🔥 Engineered roof openings with lockable covers
- 🔥 Stock standard sizes available 5,000 - 100,000 gallons with larger capacities available
- 🔥 Anti-vortex outlets ranging from two to six inches
- 🔥 Level indicator provides a true reading of the level inside the tank and is suitable for potable water and effluent applications.
- 🔥 Pioneer® Water Tanks tank liner will never leach into your water supply for a lifetime of clean water
- 🔥 Designed to meet or exceed NFPA requirements for fire protection water storage, can be used for dual purposes
